

Video Production

Supplies to bring with students to compete:

- A camera with sound capability or a camera and a separate sound recording system.
- Data card and/or media device for recording
- Card reader with cable
- Headphones that can connect to the computer for editing.

You may provide other equipment if you would like, to assist you in the creation of the short film. Judging will not take into account the equipment you bring, just your final piece.

All the best,

Robert L. Cunningham
Chair for Video Production Region 3
